## EDUCATION

**University of Cabuyao  
(Pamantasan ng Cabuyao)**  
2022-2026 | Bachelor Program

- Bachelor of Science in Computer Science
- With Honors (2nd Year, 1st Semester, 2024)
- Recipient of the Best Thesis Award

## PROFILE

I am a Bachelor of Science in Computer Science graduate at the University of Cabuyao (Pamantasan ng Cabuyao). Passionate about building scalable software and immersive user experiences. Proven track record in developing community-driven tools and algorithmic applications. Eager to contribute to real-world projects and collaborate with professional teams to solve complex technical challenges.

## RELATED EXPERIENCE

### Full-Stack Development Intern | First Laguna Land Bank

February 2026 – April 2026

- Built a web-based resort booking and listing management system using Next.js, TailwindCSS, and Supabase
- Automated the reservation process from booking request to checkout.
- Developed real-time messaging between customers and property owners.
- Created a WYSIWYG editor with live preview for property descriptions.

### Full-Stack Development | Undergraduate Thesis Project

January 2025 – December 2025

- Developed a web application for symbolic differentiation using React, Python and FastAPI.
- Generated step-by-step solutions for derivative calculations.
- Built a custom parser to analyze and evaluate mathematical expressions.
- Compared multiple data structures to optimize expression processing.

### Backend Development | Personal Project

August 2025 – May 2026

- Developed a Discord bot for ticket management and helper coordination using JavaScript, Discord.js, Supabase, and Render.
- Automated ticket creation, role notifications, and point tracking.
- Built interactive commands and role-based permissions.

### Game Development | Academic Project

February 2025 – June 2025

- Developed a Sokoban puzzle game using Unity and C#.
- Built rule-based object interactions and gameplay mechanics.
- Implemented reusable systems to support scalable level design.
